16:30				
17:00				
17:30	Hackathon Results & After Party			
18:00				

Throughout its history, the city of Berlin has experienced unique change and transformation processes. As a growing metropolis, Berlin has an outstandingly developed research landscape, the largest start-up scene in Germany and considerable land use potential. In addition, the political leadership of Berlin has set itself the goal of establishing the city as one of the leading smart cities in Europe.

At the joint stand of the capital region Berlin-Brandenburg and in the conference area we provide hands-on examples of local Smart City solutions, various Talks, Matchmaking opportunities (EEN area) and guided Smart City tours.

„Smart City Cooperations – Learning from the best“

Berlin – Amsterdam – Graz  
Evening Event, Berlin Area, 01.06.2016, 17:30 h

Berlin, Amsterdam and Graz are at the very heart of the European community of Smart cities. Although each city has its own unique character, they all share certain problems that government, business and civil society have to address: growing population and higher urbanization but limited resources. The city of tomorrow must guarantee high living and working standards in order to compete globally.

A cross-border partnership can help in bringing about joint efforts, developing solutions more quickly and efficiently and in learning from each other's experiences in pursuing implementation. Going forward, their different competences will be incorporated into an intensified collaboration in order to derive mutual benefit from their differing experiences.

A number of joint projects will be developed over the next time with different companies and institutions. They will gain more added value in becoming part of a cooperation agenda between the three cities which will focus on the topics as housing, mobility systems, energy transition, energy grids, Internet of Things / Data, city & district management and involvement of citizens.

Programme:

- 17:30 Welcome and Keynotes City of Berlin  
Permanent Secretary Dr. Hans Reckers, Senate Department for Economics, Technology and Research  
Permanent Secretary Christian Gaebler, Senate Department for Urban Development and Environment
- 17:45 The City of Amsterdam  
Ger Baron, Chief Technology officer, City of Amsterdam  
Audrie van Veen, Amsterdam Economic Board
- 18:00 The City of Graz  
Christian Nussmüller, City Department for Urban Development  
Kai-Uwe Hoffer, City Department for Urban Development
- 18:15 Get together & networking

Host: Alexander Möller, Head of Unit Smart Cities, Berlin Partner Wirtschaft und Technologie GmbH

## Smart City & WearCityHack

Last December passionate developers and ingenious makers came together at WearCityHack to imagine and build solutions for the smart city of tomorrow. In our sessions we want to have a closer look at the outcomes and methods AtomLeap, Berlin Partner and Wear It used to make WearCityHack a success. Additional speeches provide key insights into future challenges of smart cities in terms of mobility and security.

### Agenda (R11, Level 3)

- 10:00 -** WearCityHack review  
**10:30** Claudia Pelzer (Berlin Partner),  
Konstanze Neumann (AtomLeap)
- 10:30 -** Hands-on I:  
**11:00** design thinking  
Konstanze Neumann (AtomLeap)
- 11:00 -** Hands-on II:  
**12:00** rapid prototyping  
Mia Konew (AtomLeap)
- 12:00 -** Critical infrastructures:  
**12:30** security in smart ecosystems  
Bastian Halecker (AtomLeap)  
Prof. Dr. Hartmann (HTW Berlin)
- 12:30 -** Sharing infrastructures:  
**13:00** the future of mobility  
Fabian Reetz (AtomLeap)
- 13:00 -** Closing Session:  
**13:30** Future outlook & farewell  
Claudia Pelzer (Berlin Partner)  
Konstanze Neumann (AtomLeap)  
Fabian Reetz (AtomLeap)
